Phil,

Marlene owes us an email/memo on principle threat waste, and Michelle Burgess owes us a summary of HQs position on the RBA factor for the site. Both are still pending. We promised a summary of the cleanup levels and how they were developed. Can you put that together for them?

Thanks,

Gary Miller

Round and round we go... During that phone call we had last time, Michelle said she had sent her "explanation" to Marlene to be forwarded... but it never was.

Phil,

Mario is the person to talk to about the R5 site dioxin results.

Gary,
As per your voicemail, the Region 5 risk assessor who has been working on the Tittabawassee site is Mario Mangino.

And, for HQ's reason as to why the RBA of 0.05 may not be appropriate for the site, please contact Michele Burgess.

Marlene
